Berkeley

DESCRIPTORS: Electrons, *Photoemission, *Photo-
electrons, *Cathodes, *Photoelectric effect, Photo-
sensitivity, Semiconductors, Dielectrics.

Information is surveyed on electrons in metals, semi-
conductors, and dielectrics; basic laws of photoeffect
(photoelectric); spectral and integral sensitivity of
photocathodes; selective photoeffects; the photoeffect
of complex cathodes; and light and electrical curves of
complex cathodes.
